

Mother.

Mother is the word when we cry,

When we are facing problems, she will calm you.

When we are alone we think about mother only.

Because,

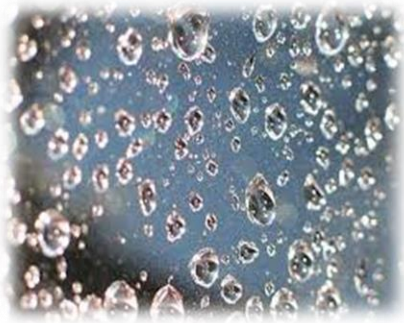

She gave birth to us, if she didn't we would not see the
beautiful wonders of the world?

If she had problems she would tell only you.

If we are wounded her heart will break.

A mother's heart is always with her children.

A drop of water is very precious to a thirsty man so, you should see your mother as a drop of water, mother is a very important role in every country.

Now onwards every mother's life should be like a sparkling flower.

Have a nice day. Thank you.
